Loyalty Data Offer for SLT Broadband Customers

Next Month Loyalty Data = (Previously Obtained Accumulated Loyalty Data + Monthly Delta (Increment)) GB

- Monthly Delta (Increment) = $[\text{Var (Data Amount)} * 0.25] / 144$ (in GB)
- Total accumulated data = Previous Month Loyalty + Monthly increment from above formula
- If downgraded during last month
Total accumulated data = $(\text{Previous Month Loyalty}/2) + \text{Monthly increment}$

Notes:

- If the package is Time based, then standard data will be considered as input parameter
 - $\text{Var (Data Amount)} = \text{Standard Data quota}$
- If the package is Anytime, then $\{\text{Anytime data}/1.5\}$ will be considered as input parameter
 - $\text{Var (Data Amount)} = \text{Anytime data}/1.5$
