Voice to Any Local Network*	UNLIMITED
SMS to Any Local Network*	1,000
Any Time Data Quota	30 GB
Number of Sub Family Members Numbers who can share the Package benefit	4 Mobile Numbers (Sub lines) + Primary Account Number (The account owner Mobile number)
Benefit sharing Numbers in the account (sub lines)	Up to five including the primary number & subline numbers can share the following. - Any Local Network Voice Minutes - Any Local Network SMS Bundle - Anytime Data Quota
Refundable Deposit (Postpaid Only)	Rs. 2,000
Package Change/Upgrade	Eligible

General Conditions

- eBilling will be mandatory for postpaid customers, and a valid email address must be provided at the time of activation.
- The NIC holder registered as the primary subscriber will be the authorized account holder responsible for managing the account and initiating any service changes.
- Sub-line users will not have the authority to modify account details but may access self-care platforms to monitor usage information.
- Multiple activations of the same plan are allowed for prepaid customers, provided there is sufficient balance in the customer's account to cover the subscription fee.
- Unutilized SMS and anytime data benefits within 30 days will expire.

New Connections – Individual Customers (Postpaid & Prepaid)

- The maximum number of connections per NIC will follow existing regulations, allowing up to five connections per individual customer.
- Customers must complete the Subscriber Application Form (physical or digital).
- The following documents must be provided:
 - Valid NIC / Driving License / Passport

Migration of Existing Customers (Only for Postpaid)

Existing postpaid subscribers will be permitted to migrate to the Family Package, subject to the following conditions:

- Customers must meet the deposit requirement applicable to the new package.
- Customers with more than three years of network tenure will be exempt from deposit increases.

Bundle Usage Conditions (Postpaid & Prepaid)

- Voice, SMS, and data benefits can be shared among all registered sub-lines within the account.
- Over-usage charges will apply as follows:

Service	Charge
SMS beyond bundle	Rs. 0.20 + taxes per SMS
Data beyond bundle	Rs. 0.30 + taxes per MB (Billed in 10KB Blocks)

- By default, data over-usage is blocked for postpaid users. Customers may enable or disable over-usage through the self-care mobile application. Prepaid customers will be able to use data beyond their data quota if sufficient credit balance is available.
- Customers (both postpaid and prepaid) are advised to activate a data add-on plan if additional data is required, in order to avoid excess usage charges. However, if a customer prefers to enable over-usage, both the primary account holder and subline users can do so via the self-care mobile application, ensuring flexibility and control over their account and usage.
- The primary account holder or a subline user can activate additional add-on plans. If the primary account holder activates add-on plans, these can be shared with subline connections. However, if a subline user activates an add-on plan, it can only be used by that specific subline connection.

Mobile Broadband Speeds

Average Network Speed	
Uplink Speed	Downlink Speed
1.5Mbps	4Mbps
#. Due to the inherent nature of wireless technologies, the actual user experience may vary from the stated average network speeds. This variation can be attributed to factors such as radio conditions, geographical features, distance, path loss, time of use (peak or off-peak), spectrum capabilities, network configurations, the device used, and external influences. Additionally, the network deployment decisions are influenced by the business viability considerations of the operator.	

- Voice calls and SMSs to Premium Short Codes used for paid services, SLT and Mobitel call center numbers are excluded from the allocated Any Net Local Voice Minute Bundle of Voice to Any Local Network & the Any Net SMS bundle to any local network. These Short Codes/Numbers may change from time to time.
