- Local any-net SMS will be charged at the standard tariff rate of Rs0.20+ Applicable Taxes per SMS, plus applicable taxes.
- If the Anytime Data Bundle is fully exhausted, an overage charge of Rs0.30+ Applicable Taxes per MB (billed in 10 KB blocks) will apply for data usage beyond the included bundle.

### Mobile Broadband Speeds

| Average Network Speed                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| Uplink Speed                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Downlink Speed |
| 1.5Mbps                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 4Mbps          |
| #. Due to the inherent nature of wireless technologies, the actual user experience may vary from the stated average network speeds. This variation can be attributed to factors such as radio conditions, geographical features, distance, path loss, time of use (peak or off-peak), spectrum capabilities, network configurations, the device used, and external influences. Additionally, the network deployment decisions are influenced by the business viability considerations of the operator. |                |

- Voice calls and SMSs to premium Short Codes used for paid services, as well as SLT and Mobitel call center numbers, are not included under this package and will be charged separately at the applicable standard rates. These Short Codes and call center numbers may change from time to time.

**Premium Short Codes**
