- 3G Break Free Plans speed limits

    - Avg. Downlink: 2 Mbps

    - Avg. Uplink: 1 Mbps

- 4G Break Free Plans speed limits

    - Avg. Downlink: 5 Mbps

    - Avg. Uplink: Max 2 Mbps

- Condition for 3G Break Free Plan

    - Any customer who activates a 3G plan will be automatically switched to 3G Network and will continue to be on 3G until the expiry of the 3G plan. After the expiry of the plan the customer will be switched back to 4G network (based on availability of 4G Networks). These conditions on Hutch communication via website, mobile apps, product brochures and SMS prior and when the customer activates the plan.

- Condition for 4G Break Free Plan

    - The 4G plans do not have any network restrictions applied and it can be used on both 4G & 3G dependent on the availability of coverage. For instance, a user who activates the 4G Break Free plan can enjoy the plan when they are on 4G network when its available in their area and if they are in a non 4G area they can enjoy internet on a 3G network, this is to ensure there is seamless experience. These conditions on our communication via website, Mobile apps, product brochures and SMS prior and when the customer activates the plan.
