Notes:

1. These plans will be available as one-time activation for prepaid customers.
2. The average network speeds for our Mobile Broadband service are approximately 4 Mbps for downlink and 1 Mbps for uplink, on best effort basis. However, these speeds are indicative and subject to variation as wireless technologies are prone to fluctuations in radio wave propagation and operate on a shared bandwidth model by their inherent nature, hence the actual user experience may vary. These broadband speeds should be considered as average for the day, derived from sample tests conducted across various time slots throughout the day.
