Uplink – *1.5Mbps

Downlink – *4Mbps

* Due to the inherent nature of wireless technologies, the actual user experience may vary from the stated average network speeds. This variation can be attributed to factors such as radio conditions, geographical features, distance, path loss, time of use (peak or off-peak), spectrum capabilities, network configurations, the device used, and external influences. Additionally, the network deployment decisions are influenced by the business viability considerations.

- Voice calls and SMSs to Premium Short Codes used for paid services, SLT and Mobitel call center numbers are excluded from the allocated ²Unlimited Voice bundle of Voice to Any Local Network. These Short Codes/Numbers may change from time to time.
